

Summer Symposium on Speech and hearing disorders

June 10, 2005, Max Planck Institute (MPI), Nijmegen, <http://www.mpi.nl>

Organized by the Dutch Society for Phonetic Sciences (NVFW) <http://www.fon.hum.uva.nl/FonetischeVereniging>
co-funded by the Centre for Psycholinguistics (CPL), University of Antwerp, Belgium <http://www.cpl.ua.ac.be>

9.00 – 9.30: Welcome – coffee & tea

PART 1. ASPECTS OF PATHOLOGICAL SPEECH PRODUCTION AND PERCEPTION

9.30 – 10.00: *Modeling stuttering*

Pete Howell (p.howell@ucl.ac.uk), Psychology Department, University College London

10.00 – 10.30: *Transcriptions of pathological speech in children*

Patricia Gulpen (patricia.gulpen@mpi.nl), Ben Maassen, Lian Nijland,
Paediatric Neurology, Medical Psychology; Radboud University Nijmegen Medical Center

10.30 – 11.00: *Auditory word recognition in aphasia: lexical activation and competition*

Esther Janse (Esther.Janse@let.uu.nl), Utrecht institute of Linguistics, OTS

11.00 – 11.30: coffee & tea

11.30 – 12.00: *Voice and speech outcome in relation to quality of life in head and neck cancer patients*

Irma Verdonck (im.verdonck@vumc.nl), VU University Medical Center, Department of
Otolaryngology

12.00 – 12.30: *The Intelligibility of Tracheoesophageal Speech, first results of a pilot study*

Petra Jongmans (pjongmans@dds.nl), Frans Hilgers, Louis Pols, Corina van As, ACLC, UvA and,
AvL hospital, Netherland Cancer Institute, Amsterdam

12.30 – 13.00: Meeting of the NVFW members

13.00-14.00: Lunch

PART 2. HEARING DISORDERS AND SPEAKING AIDS

14.00 – 14.30: *The perceptual organisation of language in the first year following cochlear implantation*

Ellen Gerrits (EGERR@skno.azm.nl), Maastricht University

14.30 – 15.00: *Language development in young children after cochlear implantation*

Margreet Langereis (m.langereis@viataal.nl), Viataal, & E. van Kneegsel, UMCN St. Radboud, Nijmegen

15.00 – 15.30: *Probing the interactive relationship between tone production and tone perception in Cantonese-speaking implant users*

Johanna Barry (johanna.barry@psy.ox.ac.uk), Department of Experimental Psychology,
University of Oxford

15.30 – 16.00: coffee & tea

16.00 – 16.30: *Phonological characteristics in the speech productions of young children after cochlear implantation*

Mieke Beers (w.beers@lumc.nl), Leiden Univ. Medical Ctr.

16.30 – 17.00: *Perception of electrical auditory stimulation*

Astrid van Wieringen¹ (Astrid.vanWieringen@med.kuleuven.ac.be), Robert P. Carlyon², Olivier
Macherey¹, Jan Wouters¹, ¹Lab. Exp. ORL, KULeuven, Leuven, Belgium; ² MRC Cognition and
Brain Sciences Unit, Cambridge, UK
