INTRODUCTION

This Proceedings 11 of the Institute of Phonetic Sciences of the University of Amsterdam contains thirteen contributions concerning our current research projects. The papers represent three main research fields:

- Perceptual and physical description of variation and invariance in speech (eight papers).
- Speech communication: development and pathology (four papers).
- History of phonetics (one paper).

For your information a list of personnel is included, as well as a list of our publications in 1986 and 1987.

Moreover, our "Institute's Profile" with up-to-date information about our institute and our research activities is available upon request.

All correspondence, including requests to be put on our mailing list, may be sent to:
